Supplementary Materials

ACCV2020

Our snapshot approach for HDR imaging

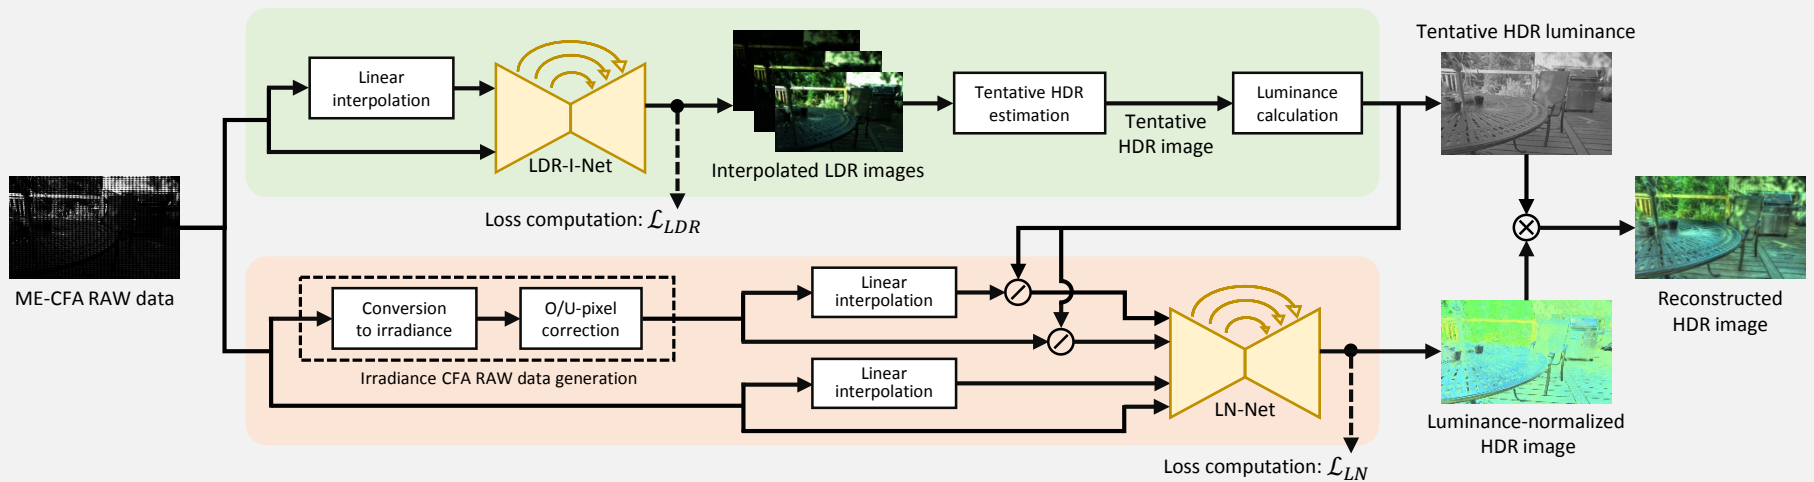

Multi-exposure CFA RAW data
(ME-CFA RAW data)

Reconstructed HDR image

Overview of our framework

Luminance estimation

Luminance-normalized HDR image estimation

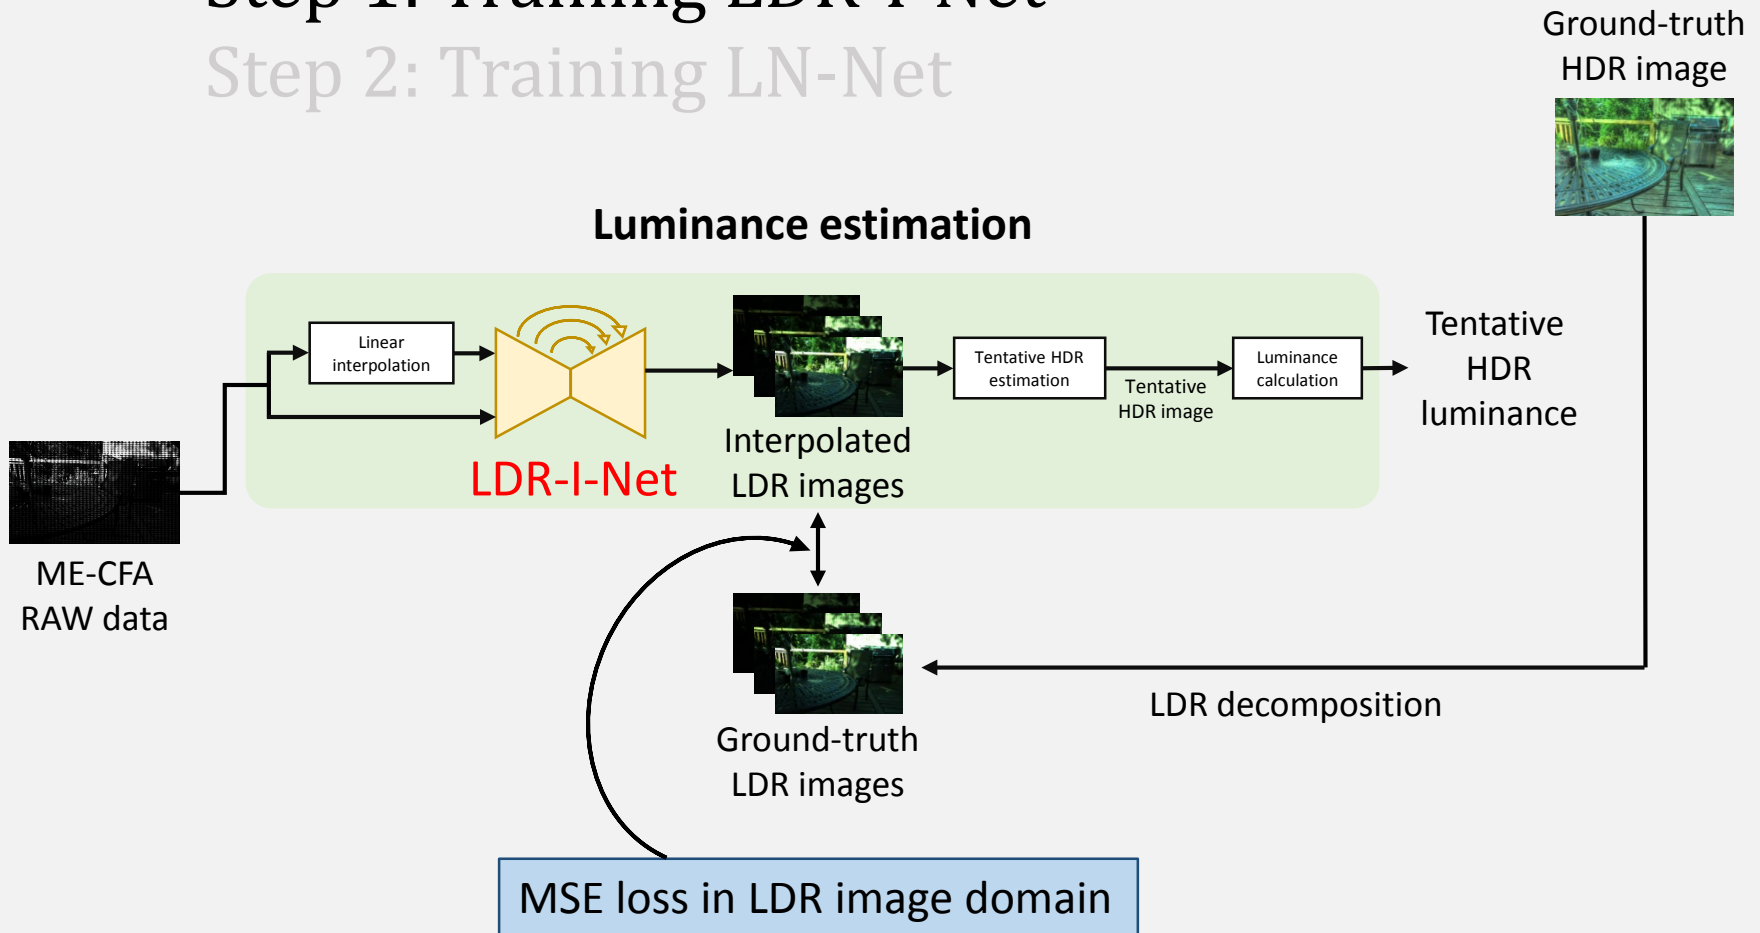

Our framework mainly consists of two parts:

1. Luminance estimation
2. Luminance-normalized HDR image estimation

Training phase:

Step 1: Training LDR-I-Net

Step 2: Training LN-Net

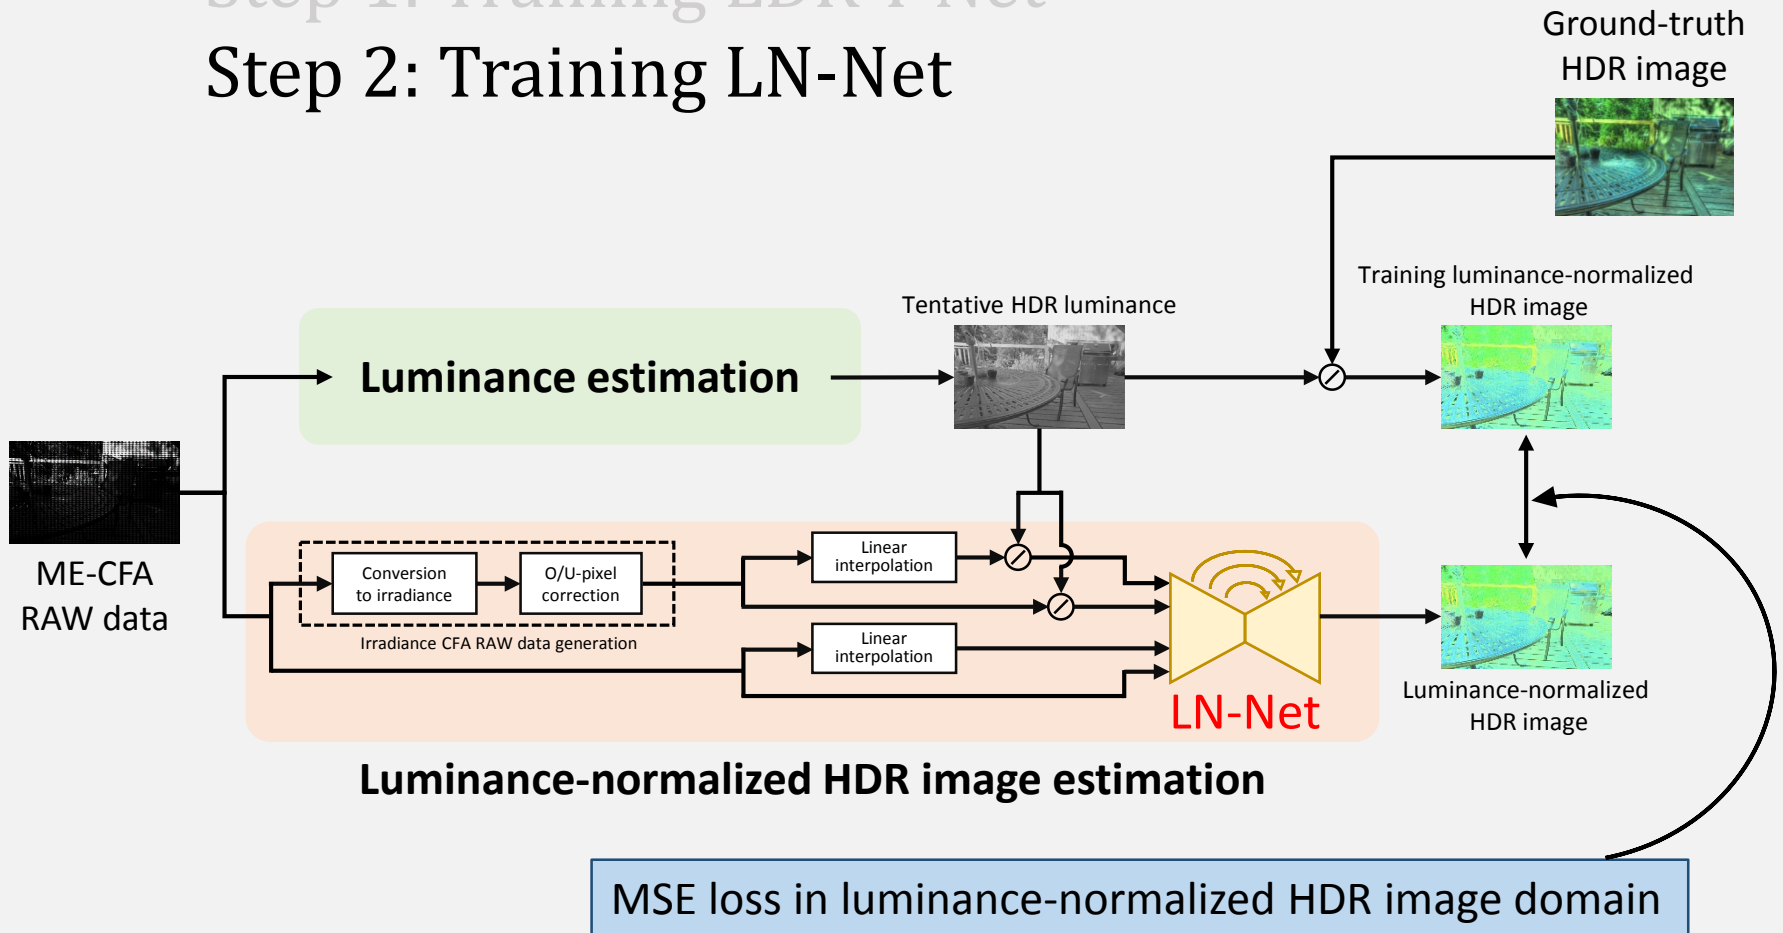

Training LDR interpolation network (LDR-I-Net) for estimating luminance

Training phase:

Step 1: Training LDR-I-Net

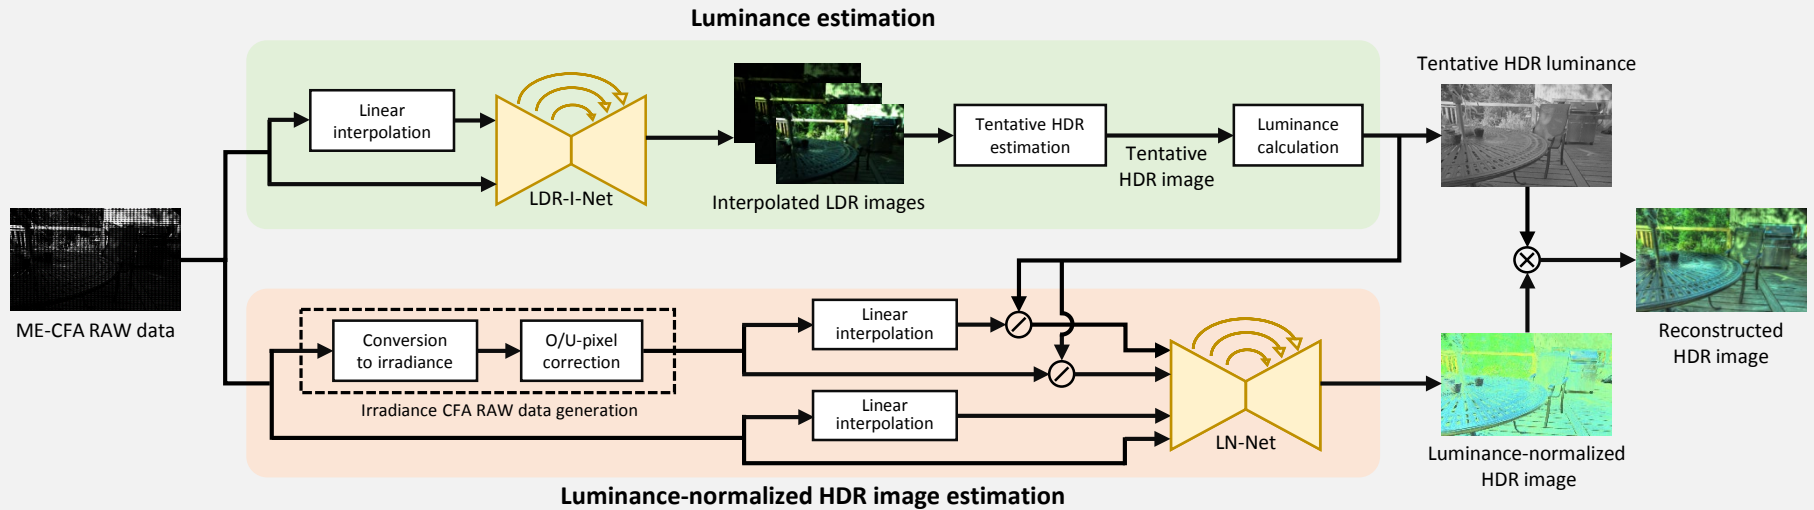

Step 2: Training LN-Net

Training luminance-normalized network (LN-Net) for HDR image estimation

Inference phase:

HDR image is reconstructed through the networks

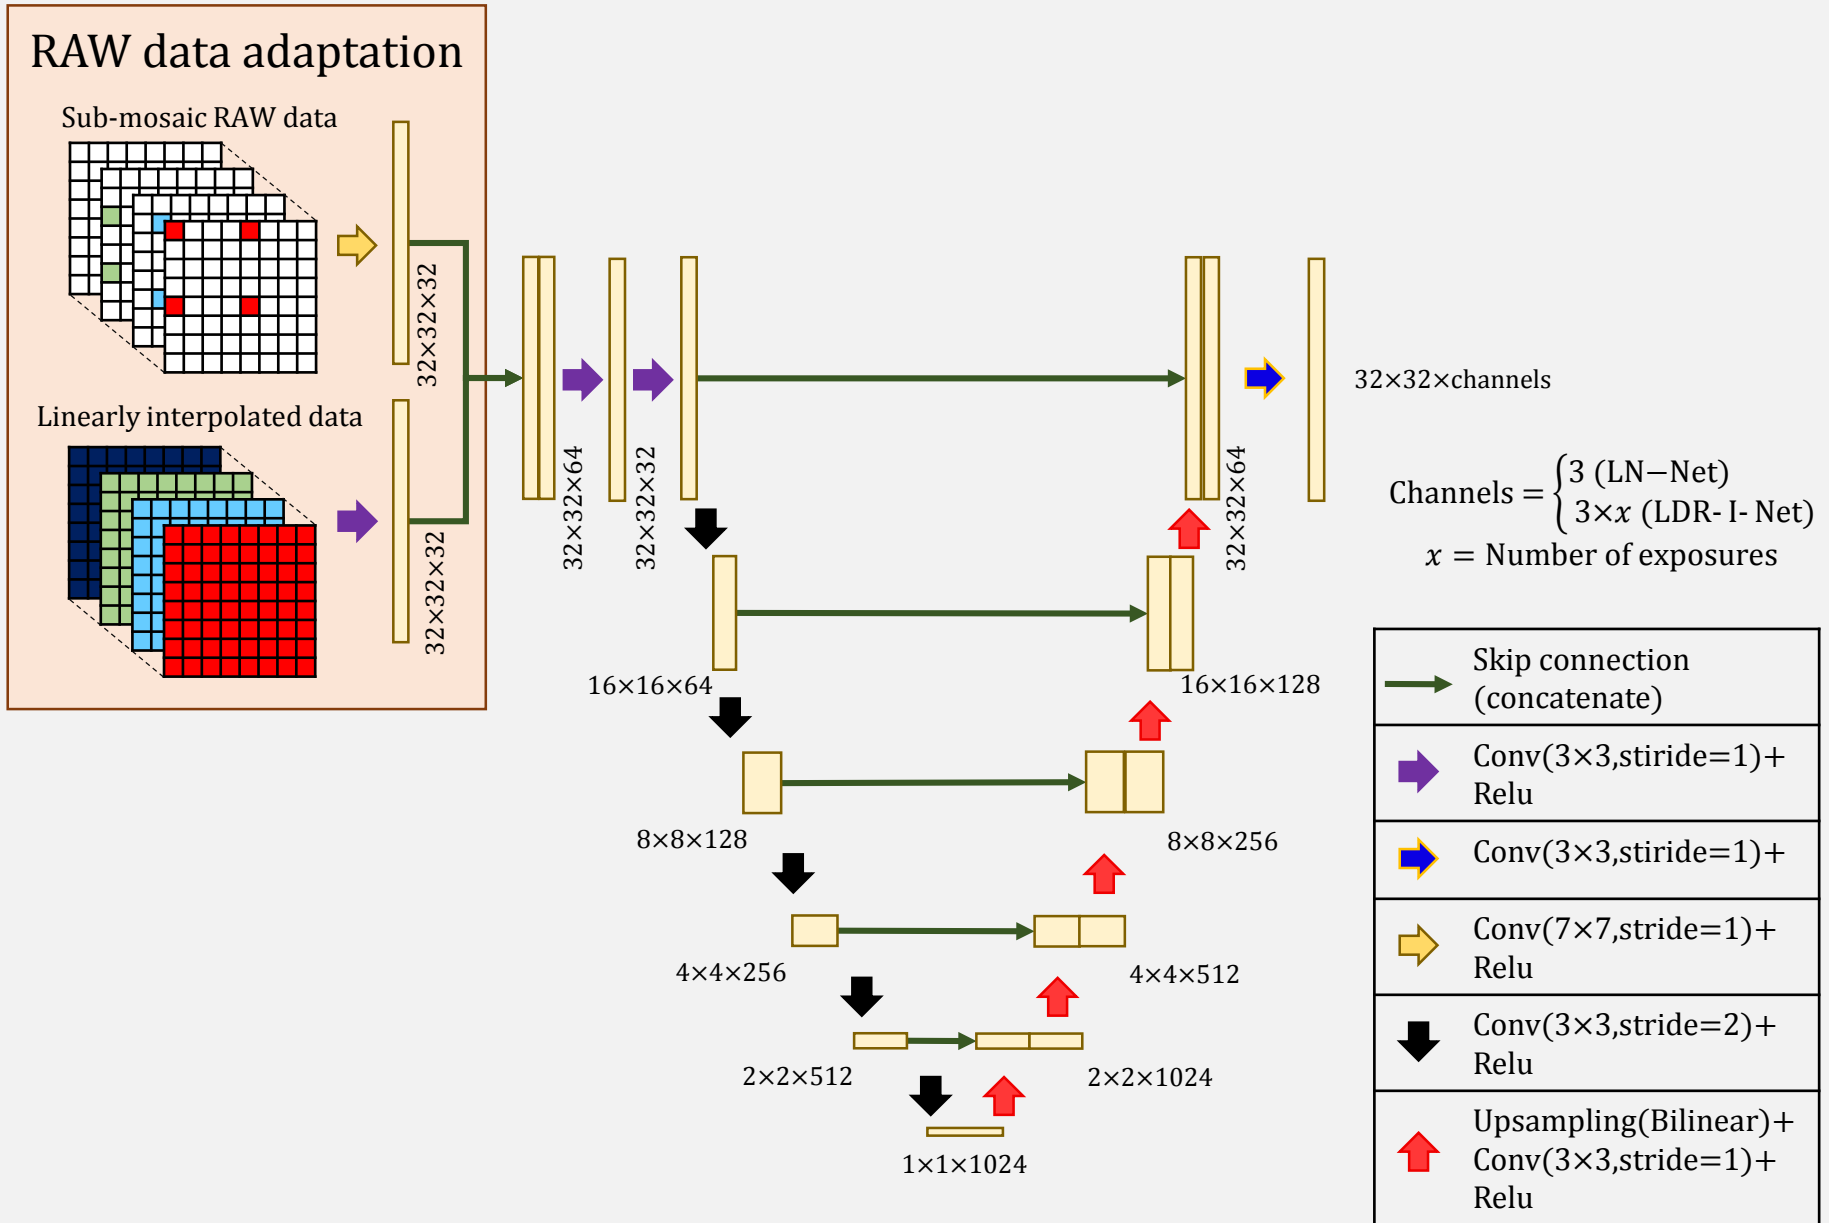

Tentative HDR luminance

Luminance-normalized HDR image

Reconstructed HDR image

Network architecture of LN-Net and LDR-I-Net
